- **Telecom NZ**
- **NZ Transport Agency**
- **Water NZ**
- **Transpower**
- **Vector**
- **Ministry of Business, Innovation and Employment**
- **GNS Science**

‘enhancing the connectivity of lifeline utility organisations across agency and sector boundaries in order to improve infrastructure resilience’

NZLC Focus Areas 2012/ 13

- **Consolidate best practice lifeline learnings from Canterbury earthquakes**
- **Support the National Infrastructure Unit in relation to infrastructure resilience**
- **Support MCDEM in relation to development of the Lifeline Utility Co-ordination role**

- **The financial support of EQC for the National Lifelines Forum is gratefully acknowledged**

Infrastructure Resilience

The Three Key Elements

- 1. Robust physical assets with key network routes having appropriate alternatives, and response arrangements in place**
- 2. Effective co-ordination arrangements (pre- and post-event)**
- 3. Realistic end-user expectations and appropriate measures of backup arrangements**

Key Publications

- **National Infrastructure Unit**
‘Infrastructure 2012’ and ‘Building Infrastructure’
- **NZLC ‘The value of lifelines seismic risk mitigation in Christchurch’**
- **IPENZ ‘A safer NZ: Reducing our exposure to natural hazards’**

Forthcoming Events

- **Continuity Forum ‘Business Continuity: Plan to Succeed’ 28 November, Wellington www.continuity.net.au**

NZLC Focus Areas 2012/ 13

- **Consolidate best practice lifeline learnings from Canterbury earthquakes**
- **Support the National Infrastructure Unit in relation to infrastructure resilience**
- **Support MCDEM in relation to development of the Lifeline Utility Co-ordination role**
